## **GENERAC®** Composite Cables

CableMaster's lineup of composite cables saves valuable time on home generator installs, allowing you to redeploy your labor assets to drive more revenue for your organization.

### NEC 2023-compliant Composite Cable

**Save up to 3 total hours on most installations**

**Reduce material cost with Comp Cable vs. conduit and wire**

### ✓ **SAVE TIME IN THE FIELD**

- Cut installation time by up to 25% compared to traditional conduit and wire installations
- Reduce risk of incorrect terminations:
  - First cable on the market with numbered wires matching Generac terminals
  - Wire colors match to Generac terminals
- Make installations easier—no more splicing into junction boxes, drilling holes into joists or pulling through conduit

### ✓ **SAVE MONEY & BOOST YOUR BOTTOM LINE**

- Future-proof your installs: CableMaster's NEC 2023-compliant comp cables include the required neutral wire, so you won't have to worry about new inventory when codes change
- Keep material off your balance sheet—CableMaster delivers Just-in-Time, when you need it
- Reduce scrap on the job site with different available lengths of cable on reels (100', 250', 500', 1,000', 2,500')
